INTRO

I am a mainly self-taught full stack developer with academic experience in Networking and IT. My personal projects have mainly been built with React.js in the frontend and Node/Express for backend/REST apis. I'm constantly on the search for opportunities to learn and grow. My previous work experience has helped me develop leadership and management skills that will surely contribute to my success as a developer.

WORK

Beyond Digital Imaging - (May 2017 - Mar 2020)

Project Coordinator - Responsible for obtaining project scope from clients, setting deadlines, defining deliverables, creating project outlines.

- Analyze production requirements and distribute to teams accordingly
- Ensure projects meet required deadlines. Assisting the production/design teams when needed.
- Follow up with any client inquiries and requests
- Training and onboarding of new employees (Coordinators/Production Staff)
